# Introduction

Thank you for using **Mill Mouse**.

Mill Mouse controls mouse with eye tracking by Tobii Eye Tracker 4C.

You can move the pointer to where you are looking at.

You can click when you keep gazing at the same place or close eyes.

# Features

## ► Support scroll operations

Mill Mouse supports scroll operations on the start menu, Web browsers, etc. You can scroll up by looking at the top of them and scroll down by looking at the bottom.

## ► Adjust against the involuntary shaking of eyes

Mill Mouse controls the mouse pointer not to be protruded from the frames of the buttons or other objects in order to make it easier to click them.

# Features

## ► Support operations on User Account Control dialog

Mill Mouse also makes User Account Control dialog clickable by eye tracking, which appeared when you install apps or run apps as administrator.

# System requirements

The followings are required to use Mill Mouse.

Device	OS	Software
<b>Tobii Eye Tracker 5</b>	Windows 10	Tobii Experience
<b>Tobii Eye Tracker 4C, Tobii EyeX, SteelSeries Sentry</b>	Windows 10, Windows 8.1, Windows 7	Tobii Eye Tracking Core Software
<b>Irisbond Duo</b>	Windows 10, Windows 8.1, Windows 7	Irisbond Duo API Libraries

# Guide to click action

You can select the input method in the settings of Mill Mouse from the followings.

1. Click when you keep gazing at the same place
2. Click when you close your eyes
3. Click when you press button on game controller
4. Use head tracking

The default setting is 1. This guide is based on 1.

For the usage when selecting 2, please change the description of “keep gazing” to “close eyes” in this guide. When selecting 3, please change the description to “press button on game controller while gazing”. When selecting 4, please change the description to “change your head pose while gazing”.

# Installation

Please extract the ZIP file of Mill Mouse anywhere.

Mill Mouse folder and the following 2 items will be extracted.

<b>Mill_Mouse_711.exe</b>	Installer
<b>UserGuide.pdf</b>	This file

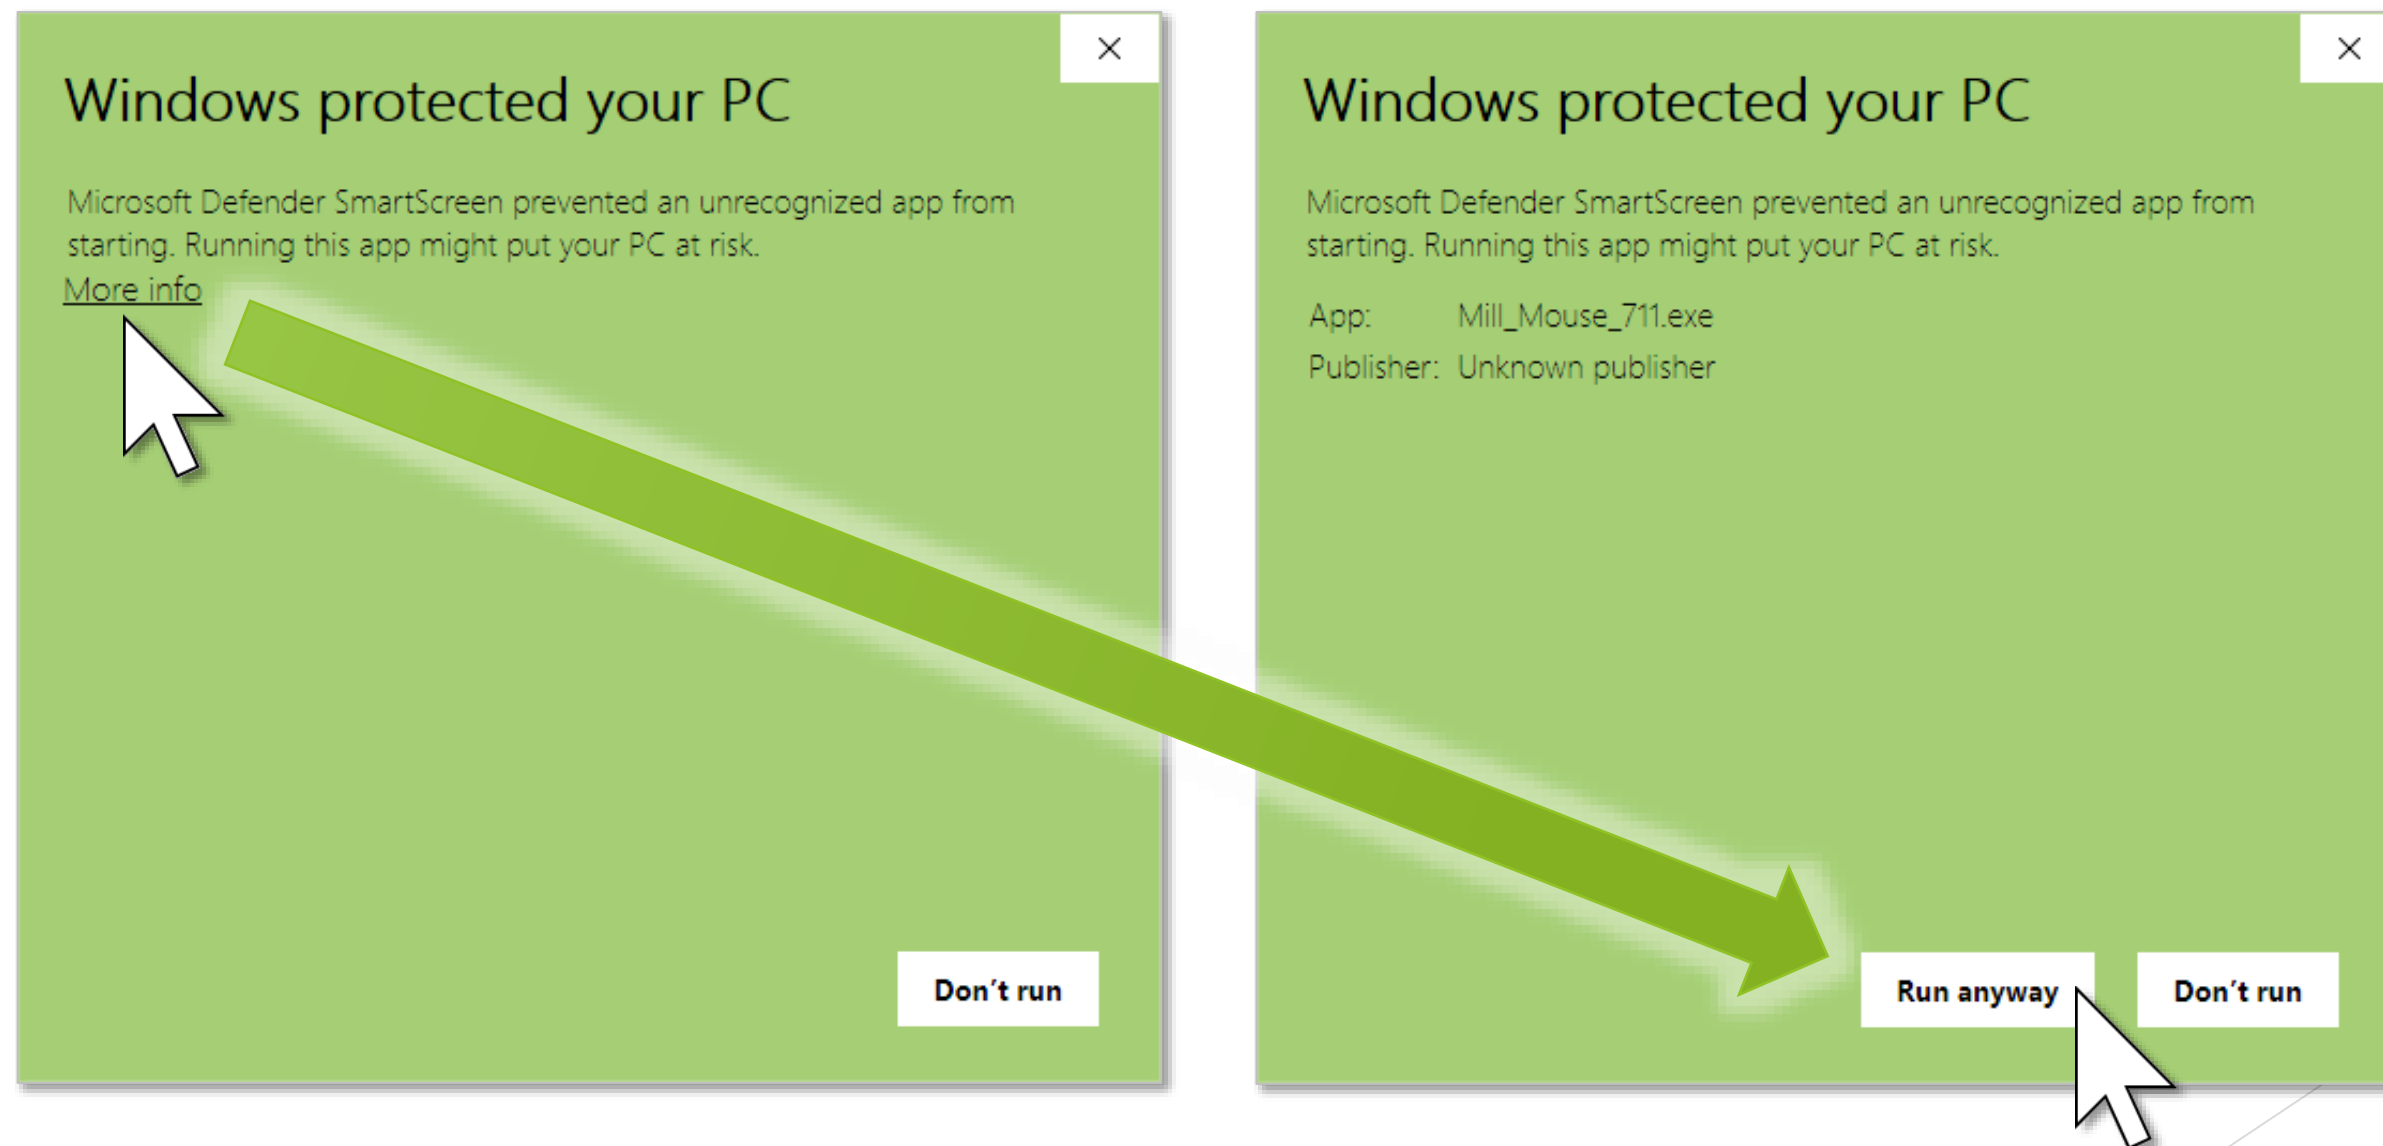

✂ .exe or .pdf is not displayed in some cases.

# Installation

Run Mill\_Mouse\_711.exe.

If the SmartScreen like following is displayed, click 'More Info' and 'Run anyway'.

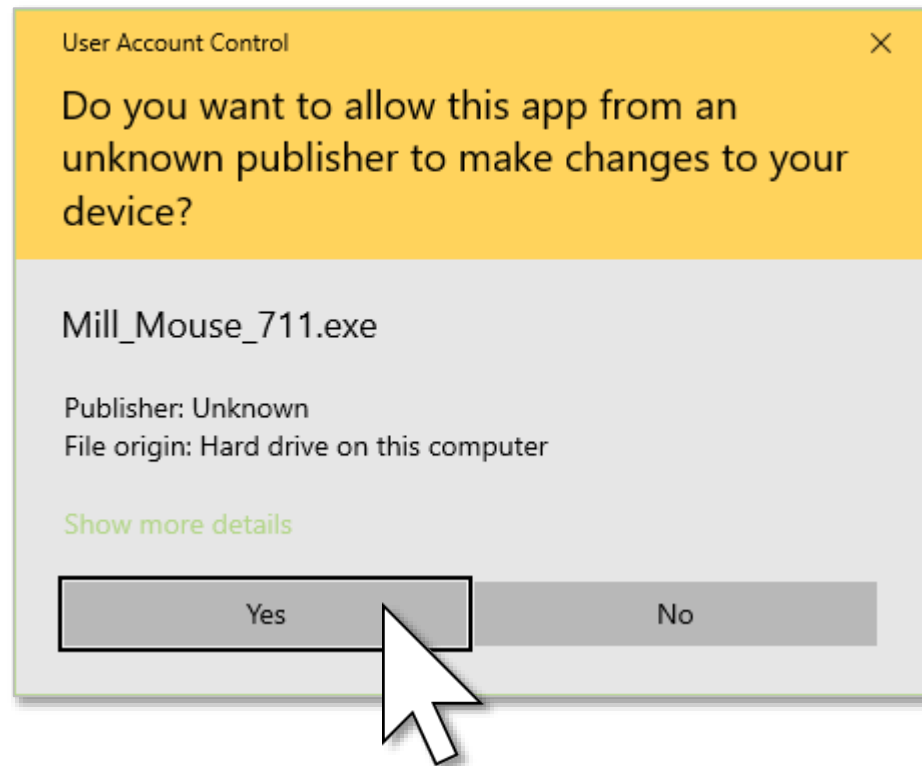

✂ If you have installed Mill Mouse, Publisher will be displayed as topolo-Z.

# Installation

Click Yes on the User Account Control dialog.

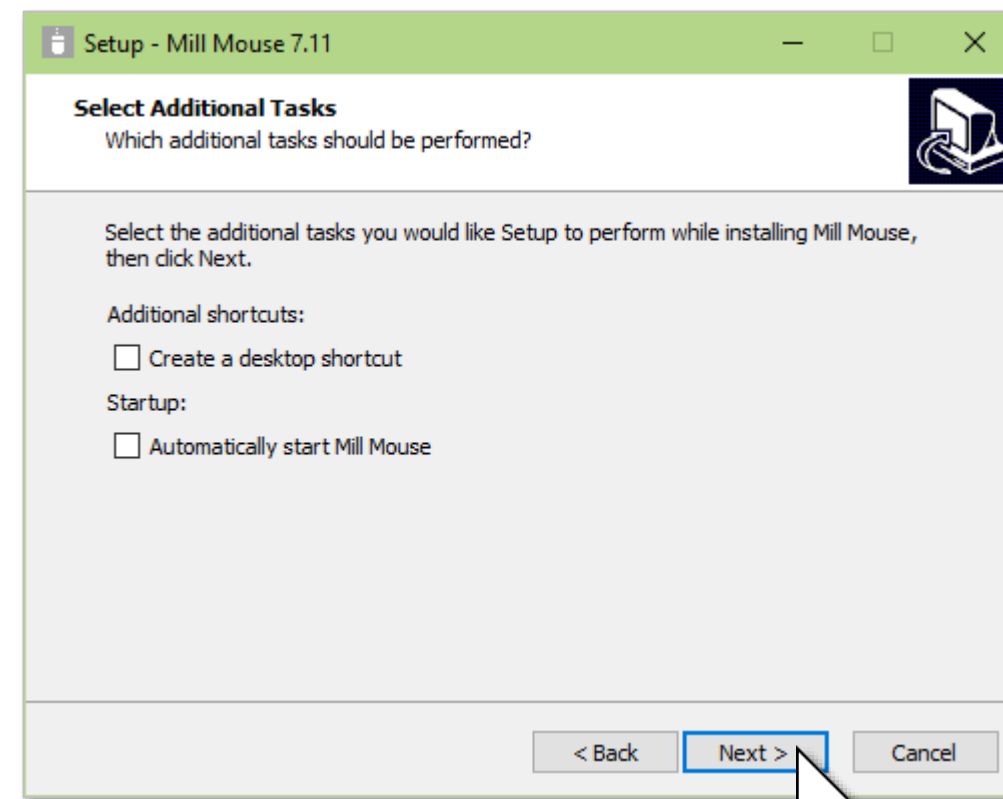

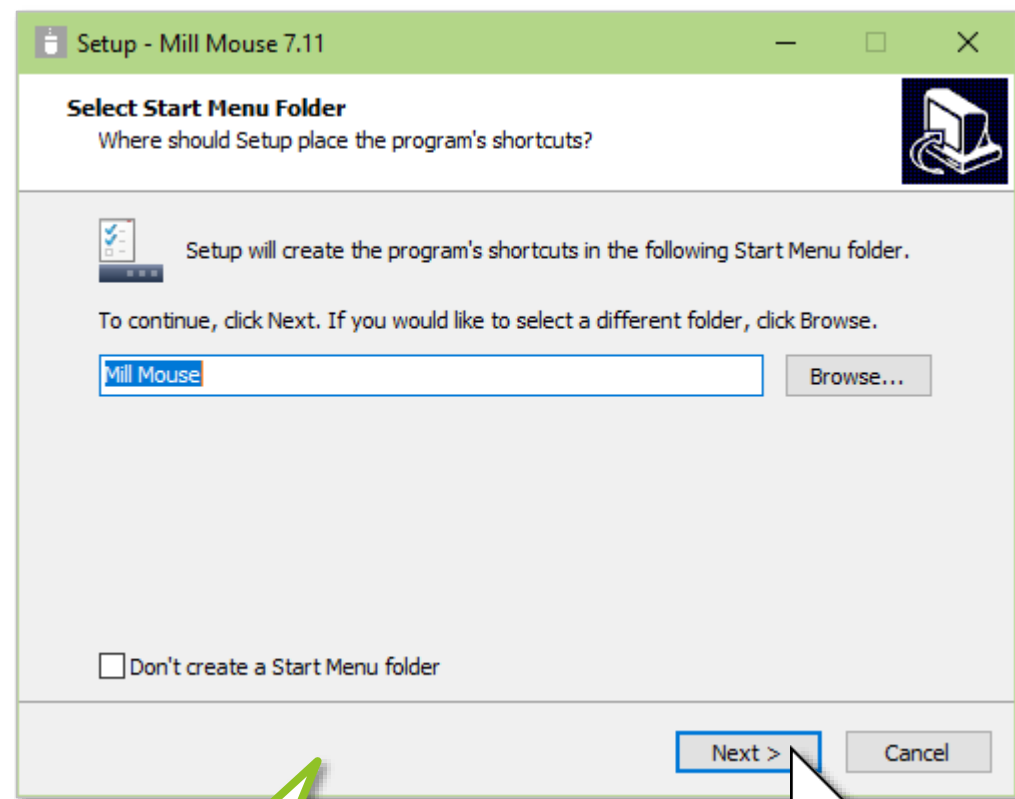

✂ If you have installed Mill Mouse, Publisher will be displayed as topolo-Z.

# Installation

Click Next once or twice.

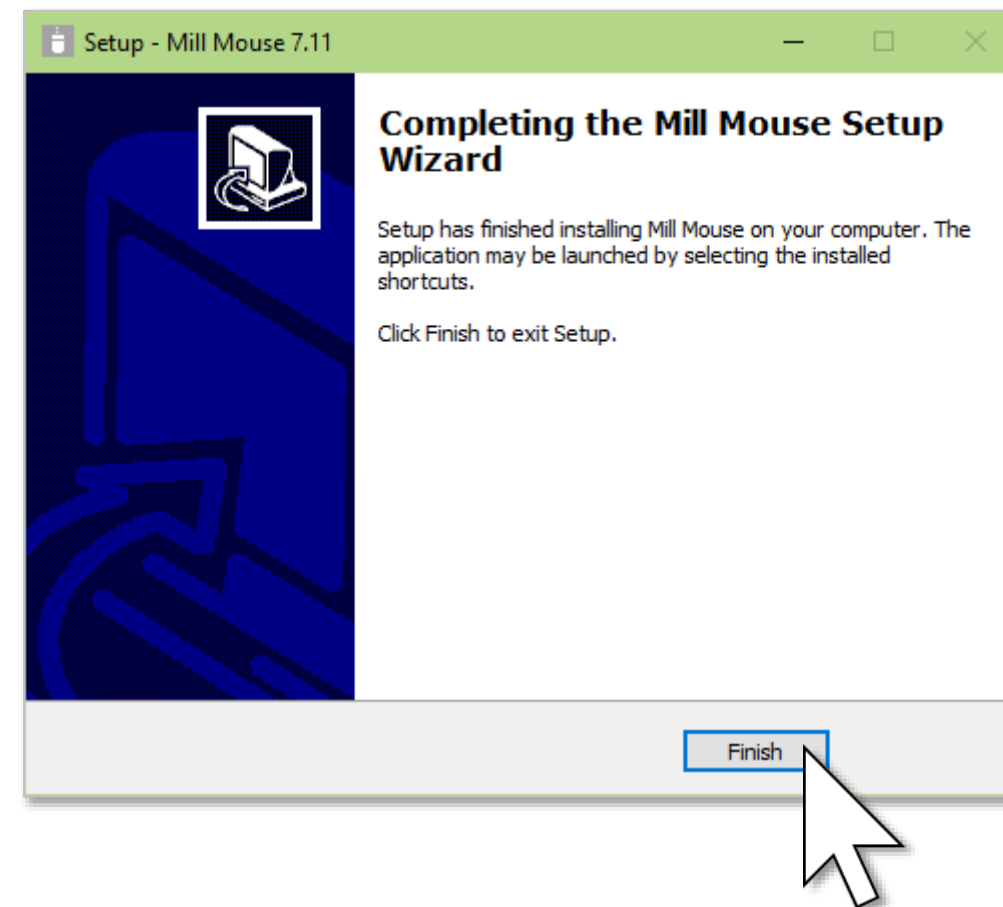

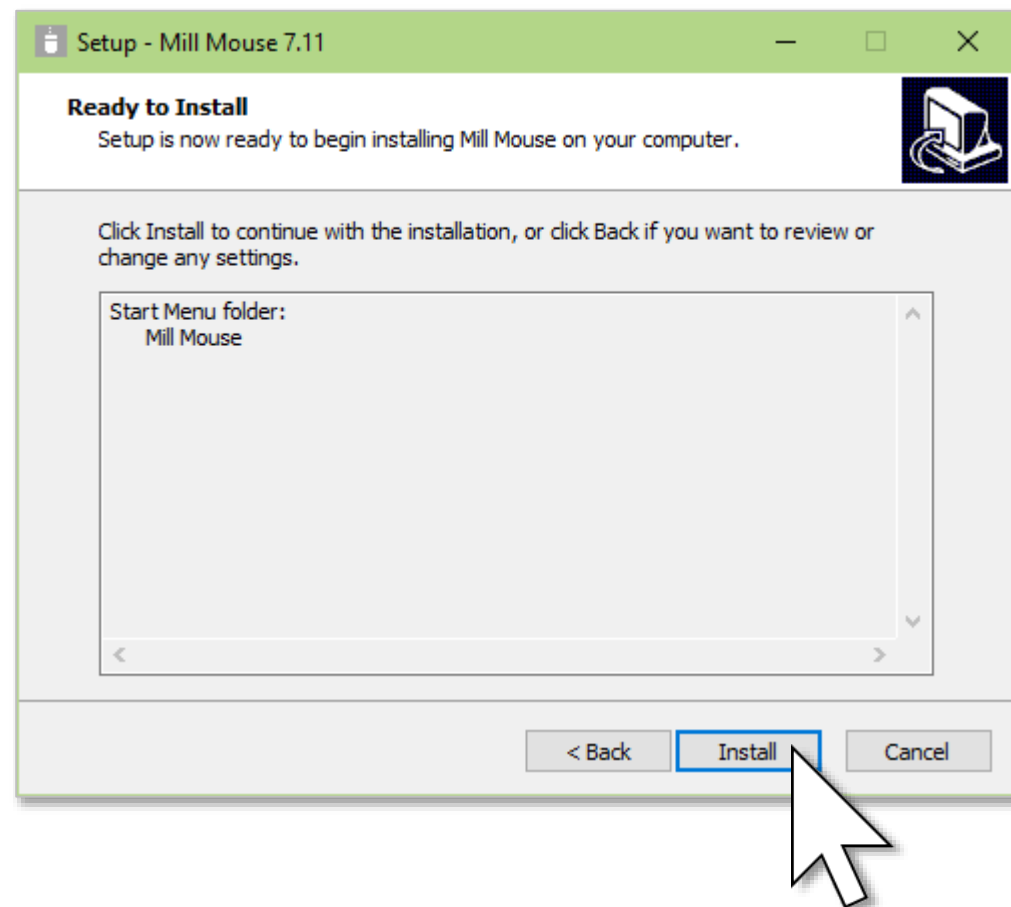

If you have installed Mill Mouse, this screen will be skipped.

# Installation

Click Install and Finish.

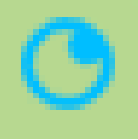

To complete the installation of Mill Mouse, sign out from Windows once and sign in again.

# Installing Tobii Experience

If you want to use Tobii Eye Tracker 5 but have not yet installed Tobii Experience, please install it with the following steps.

1. Access the following URL.  
<https://gaming.tobii.com/getstarted/>
2. Click 'tobii' as the hardware and select Tobii Eye Tracker 5 as the Device.
3. Click 'Download Driver' to download the installer and run it.
4. After installation is complete, connect Tobii Eye Tracker 5 to your PC.
5. Click  icon in the notification area of the taskbar.
6. In the opened Microsoft Store, click Install to download, then click Launch.
7. Follow the instructions on the screen to make the settings.

# Installing Tobii Core Software

If you want to use Tobii Eye Tracker 4C, Tobii EyeX, or SteelSeries Sentry but have not yet installed Tobii Eye Tracking Core Software, please download and install it from the following URL.

<https://gaming.tobii.com/getstarted/?bundle=tobii-core&autodownload=true>

- ✂ It is not allowed to install both Tobii Eye Tracking Core Software and Tobii Experience on the same PC. If you already have Tobii Experience installed, please uninstall Tobii Eye Tracking For Windows from 'Programs and Features' in Control Panel before installing Tobii Eye Tracking Core Software.

# Installing Irisbond Duo API Libraries

If you want to use Irisbond Duo but have not yet installed Irisbond Duo API Libraries, please access the following URL, click Download of Drivers, and install it.

<https://www.irisbond.com/en/support-and-training/download/>

# How to use

# Launch Mill Mouse

Connect Tobii Eye Tracker 4C or other eye tracking device to your PC.

From Start menu, click Mill Mouse folder > Mill Mouse.

Mill Mouse starts up and the window will be appeared at the top left of the desktop screen.

- ✂ The number of buttons on the right side of the window depends on the size of the desktop screen.
- ✂ When the task bar is placed to the top or the left, the window will be appeared at the bottom right.

# Basic functions

The each functions are as follows:

① Change click action

② Zoom to apps

③ Switch magnifier

④ Switch touch keyboard

⑤ Perform shortcuts and show next/previous

⑥ Expand/collapse window

# Change click action

You can change the click action performed when you keep gazing at the same place. Each time you look at the button on the far left of the window, the action will be changed.

You can change between seven types of actions by default: Click, Double Click, Drag, Right Click, Tap, Choose, and No Click.

You can change the settings of Mill Mouse to use only certain click actions.

- ✂ Tap action is not supported on Windows 7.
- ✂ If 'Switch primary and secondary buttons' is enabled for the mouse, it will be left click rather than right click.

# To change click action frequently

By changing the click action to Choose, you can select the action each time you keep gazing at the same place.

① Change to Choose.

② When you keep gazing at the same place, the action panels will be displayed around.

③ When you keep gazing at any panel, that action will be done. If you do not want to action anything, keep gazing at anywhere other than the panels or close your eyes.

※ If you keep gazing on the touch keyboard or the on-screen keyboard, the click action will be done without displaying the action panels.

# Zoom on apps

You can zoom the Web browsers or some other apps by using Stretch or Shrink on the second from the left of the window.

① Change to Stretch or Shrink.

② If you keep gazing at the same place on the Web browser or other apps, the zoom action will be done.

③ To stop zooming, switch to the click action on the left side of the window of Mill Mouse.

※ Some apps may not support zoom action.

# Switch magnifier

By using Magnifier on the third from the left of the window, you can zoom in on the desktop screen before the click action.

① Look at Magnifier to turn it on.

② If you keep gazing at the same place, its surroundings will be zoomed in.

③ If you keep gazing at the same place while zooming, the click action will be done.

④ To turn Magnifier off, look at Magnifier again.

※ On Windows 7, Magnifier is only available when Windows Aero is enabled.

# Switch touch keyboard

You can switch show/hide of the touch keyboard by looking at Keyboard on the fourth from the left of the window.

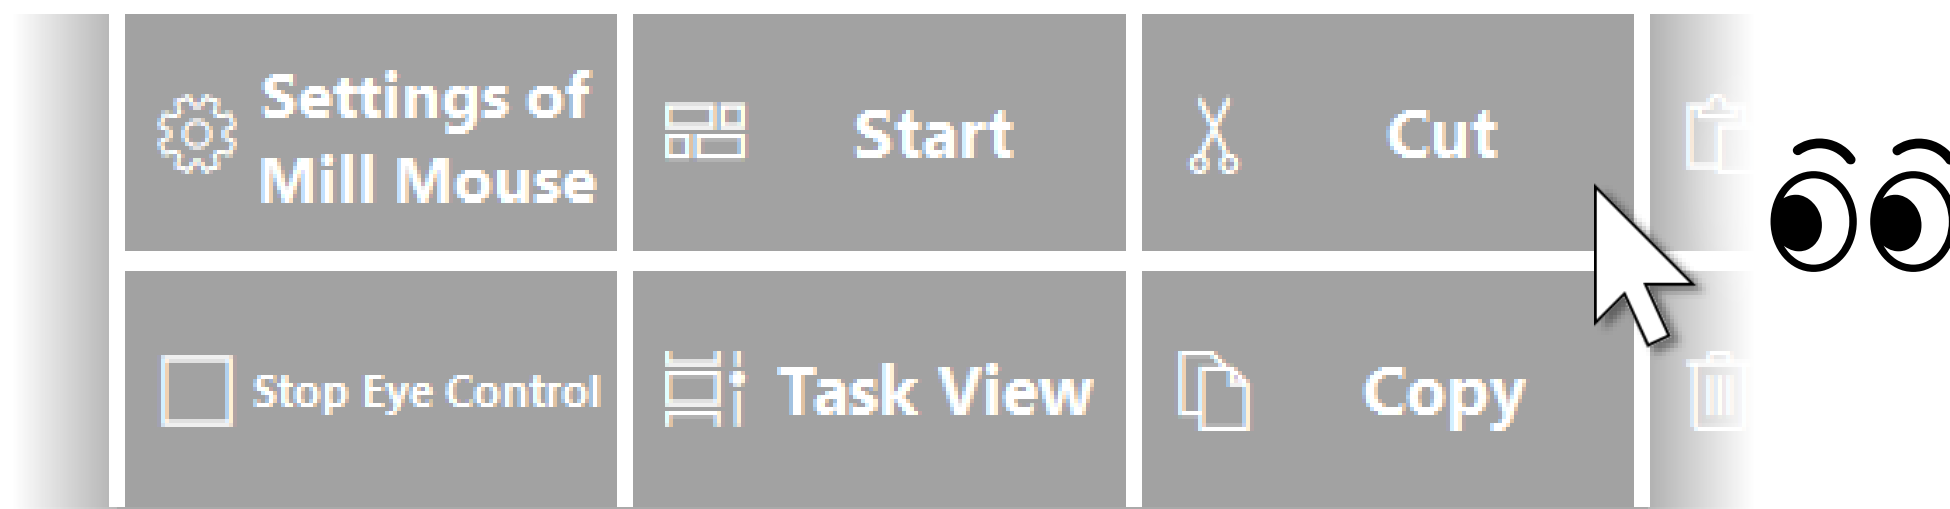

You can also use the on-screen keyboard instead of the touch keyboard by changing the settings of Mill Mouse.

# Perform shortcuts

If you look at any button on the right side of the window, you can perform shortcuts assigned to them, such as Ctrl + X, Ctrl + V, and so on.

You can change the settings of which shortcuts are displayed in the window.

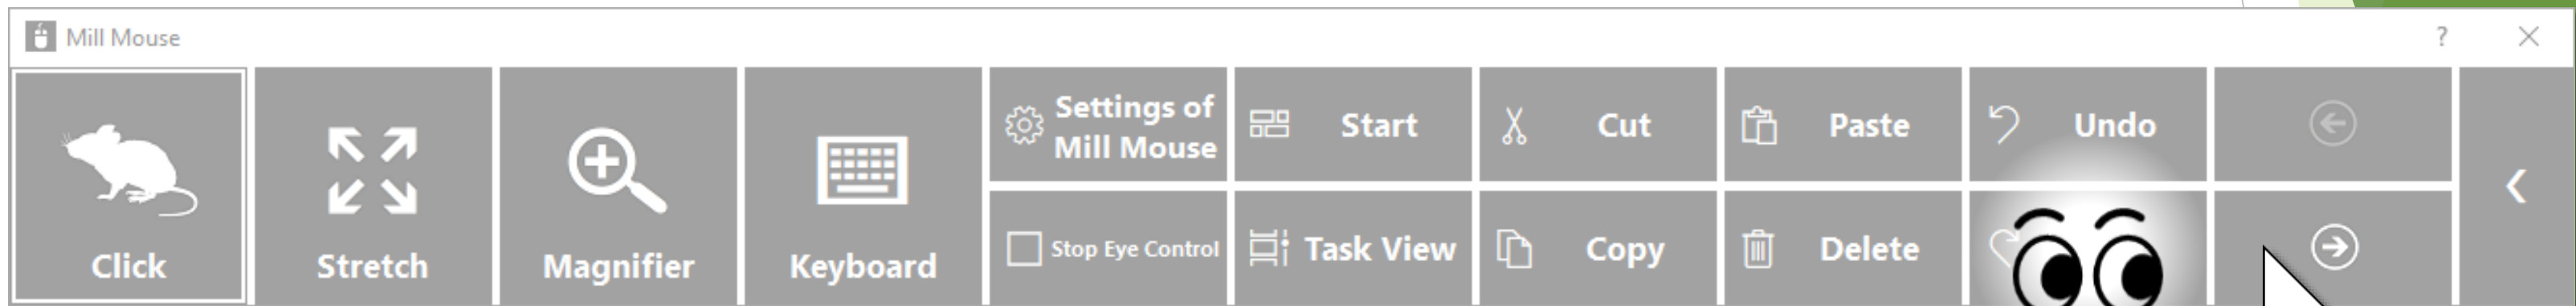

✂ On Windows 8.1 and Windows 7, shortcut icons are not displayed.

# Show next/previous shortcuts

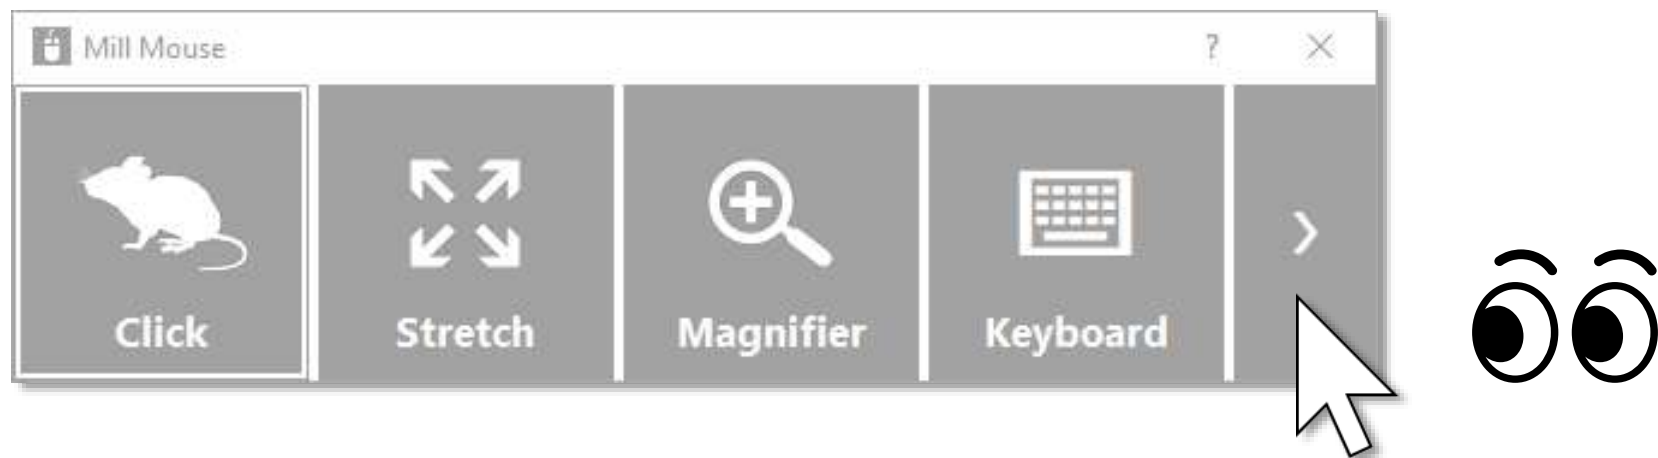

You can set up to 20 shortcuts. The window displays some of them to fit on the desktop screen. By looking at the buttons on the second from the right of the window, you can display the rest of them.

# Expand/collapse window

You can collapse or expand the window by looking at the button on the far right of the window.

# Unhide window

By default, the window will be hidden after a while.

To unhide, look at the upper left corner of the desktop screen.

If it does not work, try to look at the outer frame of the monitor.

- ✂ Whether or not to automatically hide the window can be changed by settings.
- ✂ If the taskbar is located at the top or the left, look at the bottom right corner of the screen.

# Exit Mill Mouse

To exit Mill Mouse, look at the X button at the top right of the window.

# Settings of Mill Mouse

# Settings - Open settings dialog

If the shortcut of 'Settings of Mill Mouse' is displayed in the window, you can open the dialog to change the settings of Mill Mouse by looking at it.

If 'Settings of Mill Mouse' is not displayed, keep gazing at the title bar of the window to display the menu. Then, keep gazing at Settings on the menu. After that, the settings dialog will be opened.

# Settings - Speed adjustments

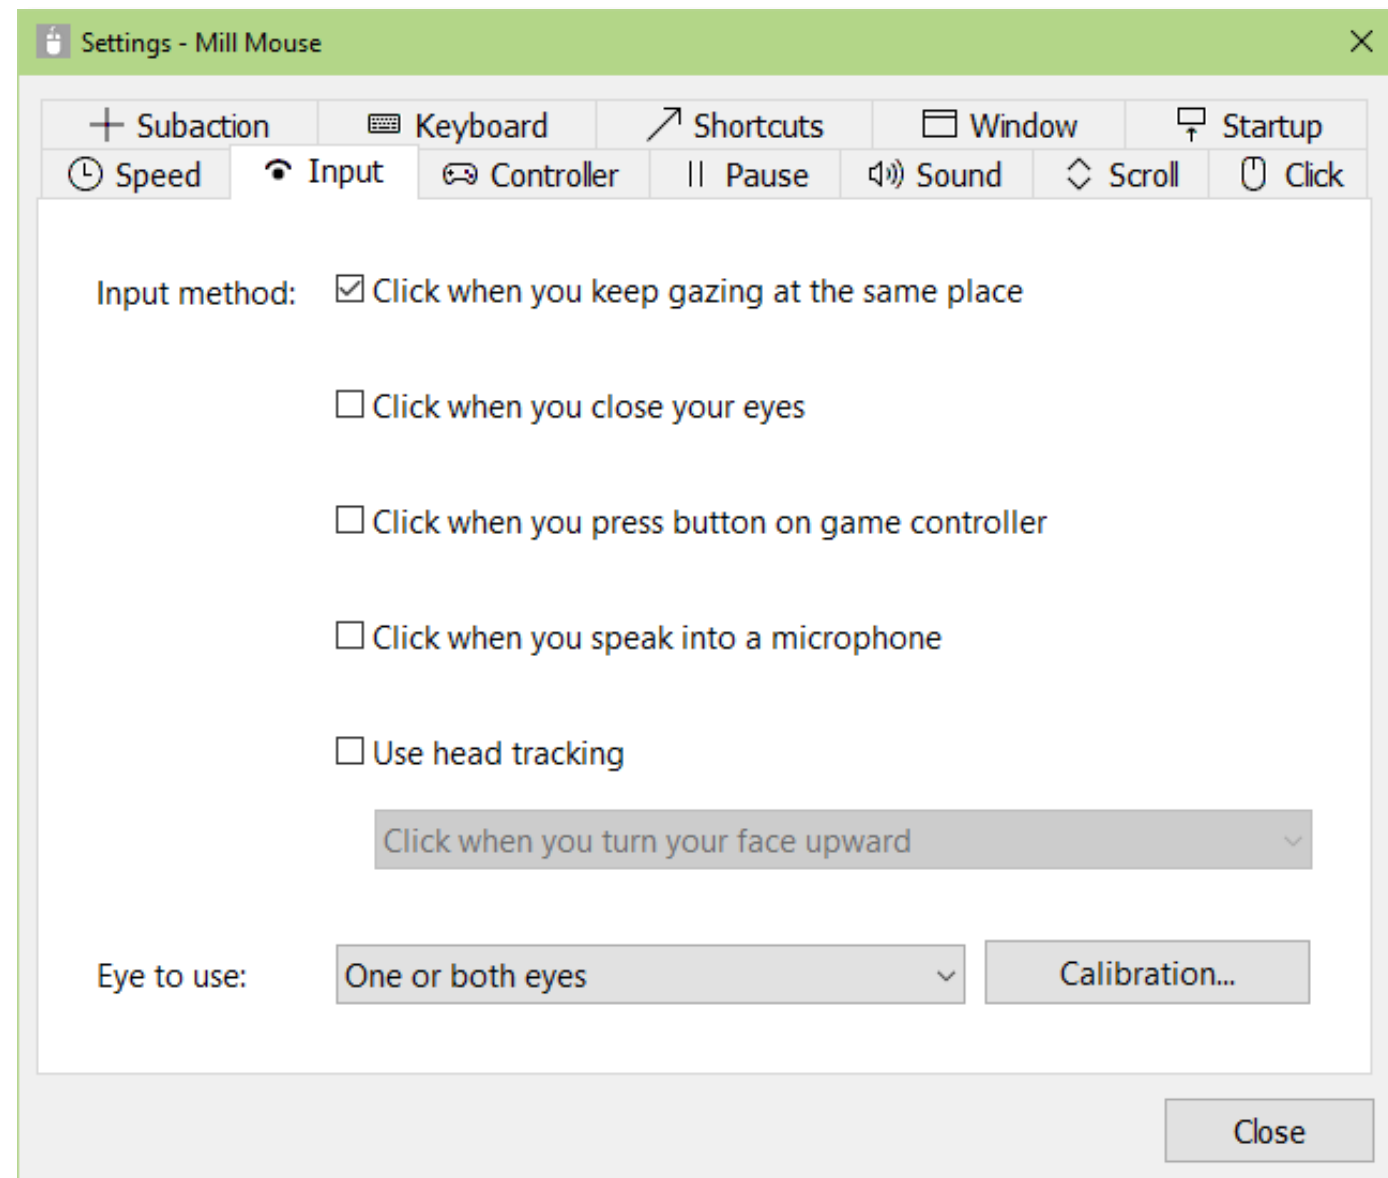

You can adjust the speeds on the Speed tab of the settings dialog.

# Settings - Input method

You can change the input method on the Input tab of the settings dialog.

- ✂ You can adjust the microphone sensitivity in Control Panel > Sound > Recording > Default Device > Properties > Levels.
- ✂ 'Use head tracking' is only available with Tobii Eye Tracker 5 or Tobii Eye Tracker 4C.

# Settings - Input method

Depending on the setting of 'Input method' on the Input tab, the meaning of 'Click interval' on the Speed tab changes as follows:

<b>'Input method' on Input tab</b>	<b>Meaning of 'Click interval' on Speed tab</b>
If you select 'Click when you keep gazing at the same place'	How long time you keep gazing at the same place in order to perform the click action
If you select 'Click when you close your eyes'	How long time you keep closing your eyes in order to perform the click action
If you select 'Click when you press button on game controller'	No effect
If you select 'Click when you speak into a microphone'	How often to perform the click action when you continue speaking
If you select 'Use head tracking'	No effect

# Settings - Game controller

On the Controller tab of the settings dialog, you can map specific click actions to the 10 buttons on your game controller.

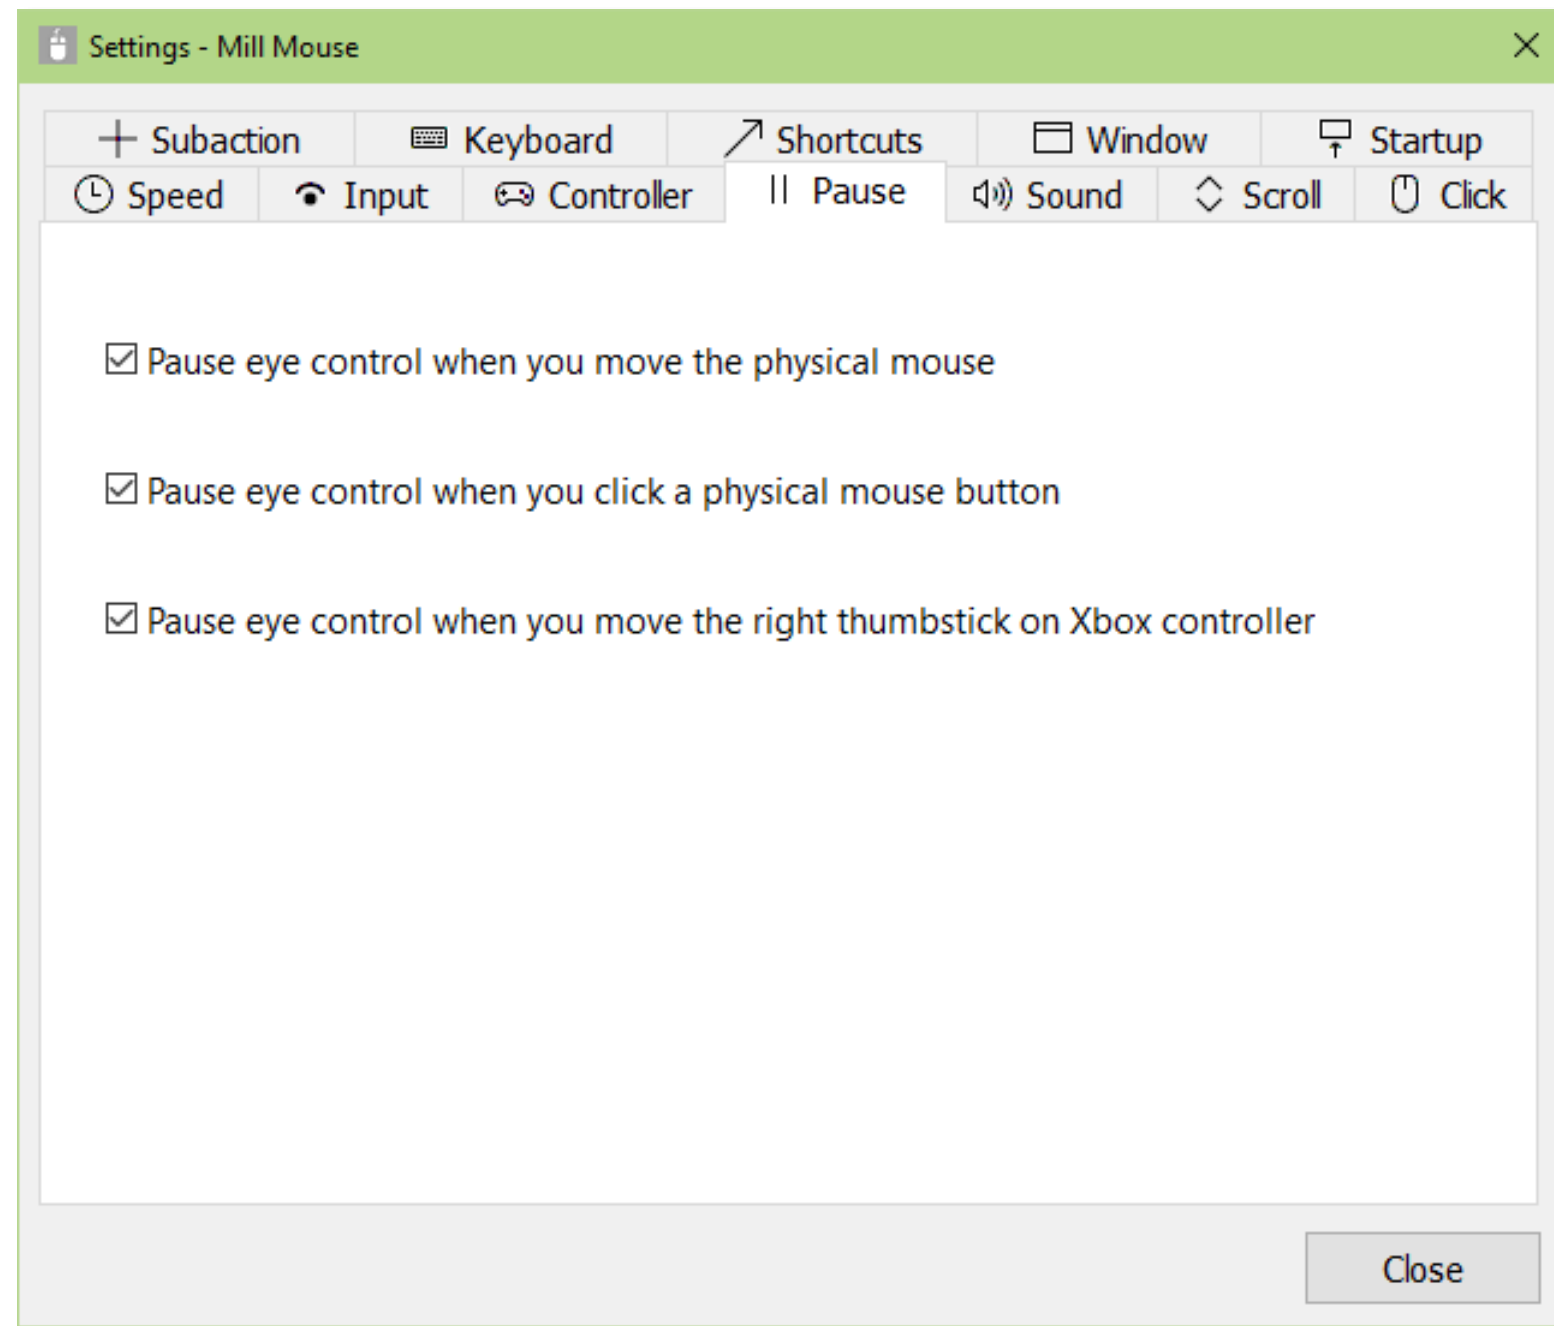

For Xbox controllers,  
'1' corresponds to A button,  
'2' corresponds to B button,  
'3' corresponds to X button, and  
'4' corresponds to Y button.

# Settings - Pause

On the Pause tab of the settings dialog, you can change whether to pause the eye tracking when you use the physical mouse.

# Settings - Sound

On the Sound tab of the settings dialog, you can change whether to use click sound and the voice to read texts aloud.

✂ To use non-English voice on Windows 7, please install [Microsoft Speech Platform Runtime](#) and [Text-to-Speech engine data](#) additionally.

# Settings - Scroll

On the Scroll tab of the settings dialog, you can change whether to use scrolling feature and the lines to scroll each time.

# Settings - Click action

You can change to use only certain click actions on the Click tab of the settings dialog.

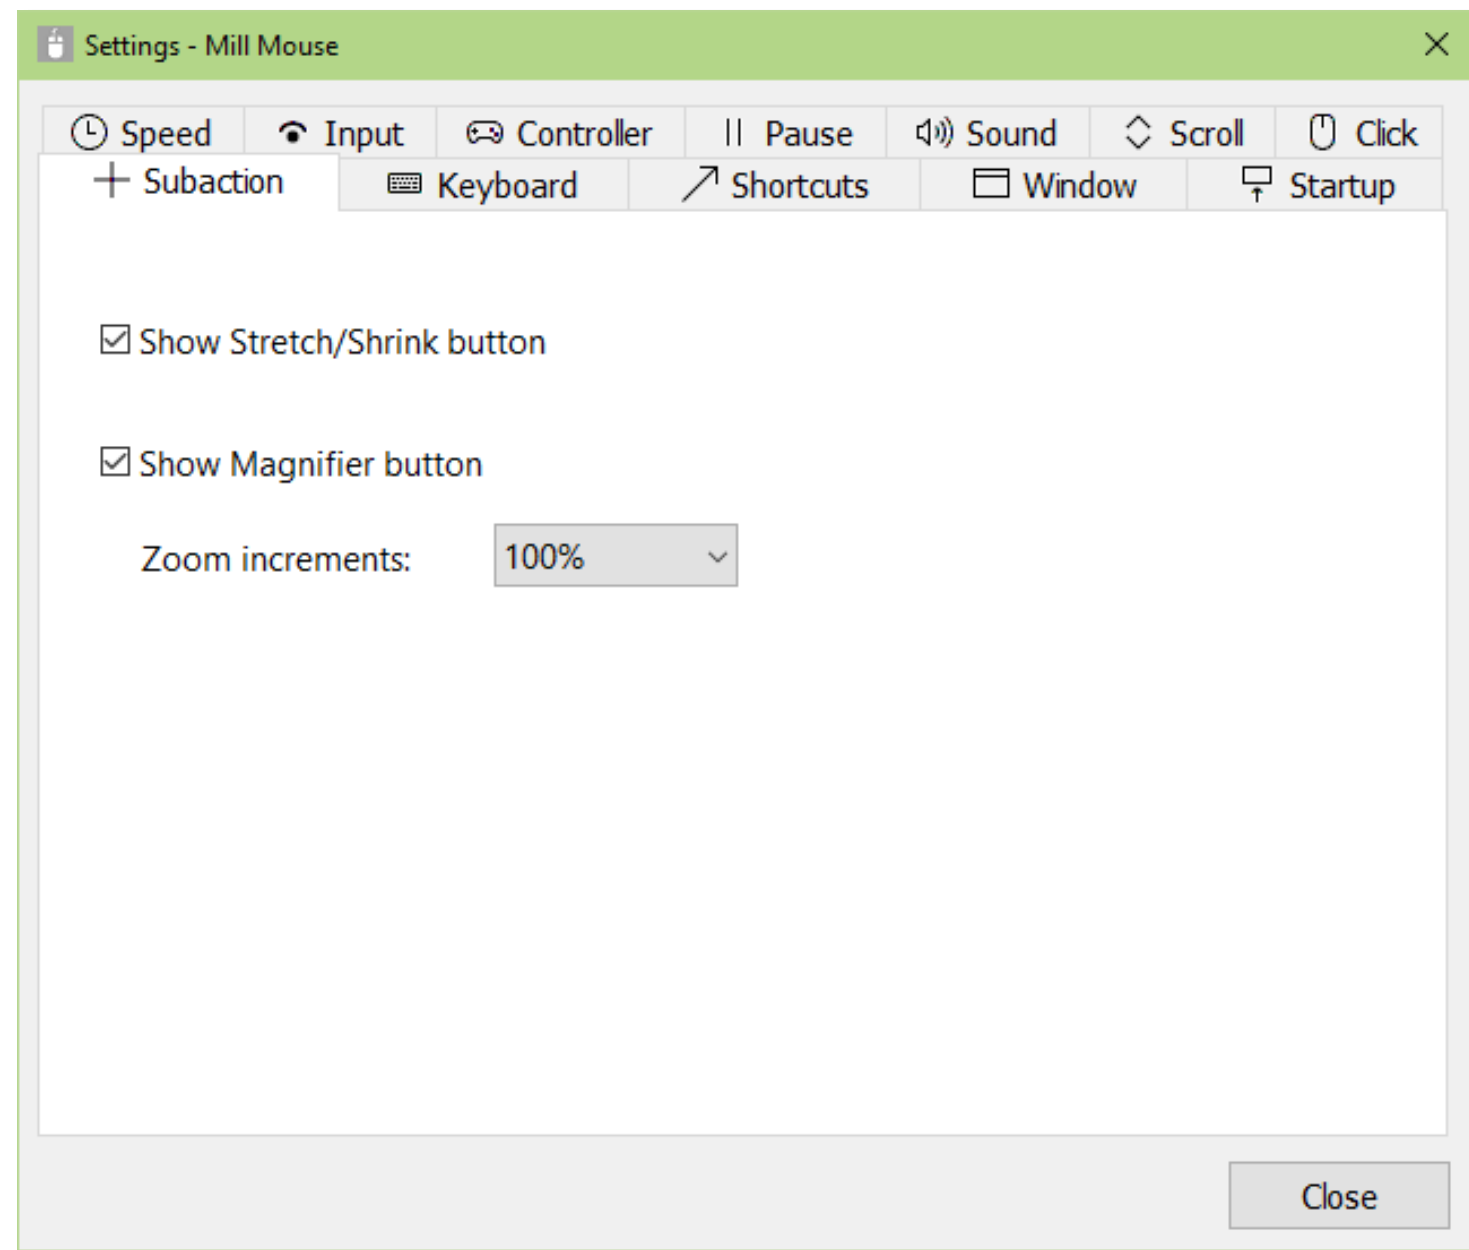

Check the actions to use.  
Uncheck the actions not to use.

# Settings - Zoom and magnifier

On the Subaction tab of the settings dialog, you can change whether to show Stretch/Shrink or Magnifier button in the window and the zoom increments of the magnifier.

# Settings - Keyboard

On the Keyboard tab of the settings dialog, you can change whether to show keyboard button in the window and whether to use the touch keyboard or the on-screen keyboard.

# Settings - Shortcuts

You can change the shortcuts to be displayed in the window from the Shortcuts tab of the settings dialog.

You can set up to 20 shortcuts.

# Settings - Shortcuts

85 types of shortcut keys listed at the end of this guide are available as shortcuts.

In addition to the shortcut keys, the following 9 types of shortcuts for Mill Mouse are also available.

- ▶ Settings of Mill Mouse
- ▶ Calibration
- ▶ Move Mill Mouse
- ▶ Move Mill Mouse Up
- ▶ Move Mill Mouse Down
- ▶ Hide Mill Mouse
- ▶ Stop Eye Control
- ▶ Hide Pointer
- ▶ Exit Mill Mouse

✂ 'Move Mill Mouse Up' and 'Move Mill Mouse Down' will be changed to 'Move Mill Mouse Left' and 'Move Mill Mouse Right' when the window of Mill Mouse is displayed vertically.

# Settings - Add custom shortcuts

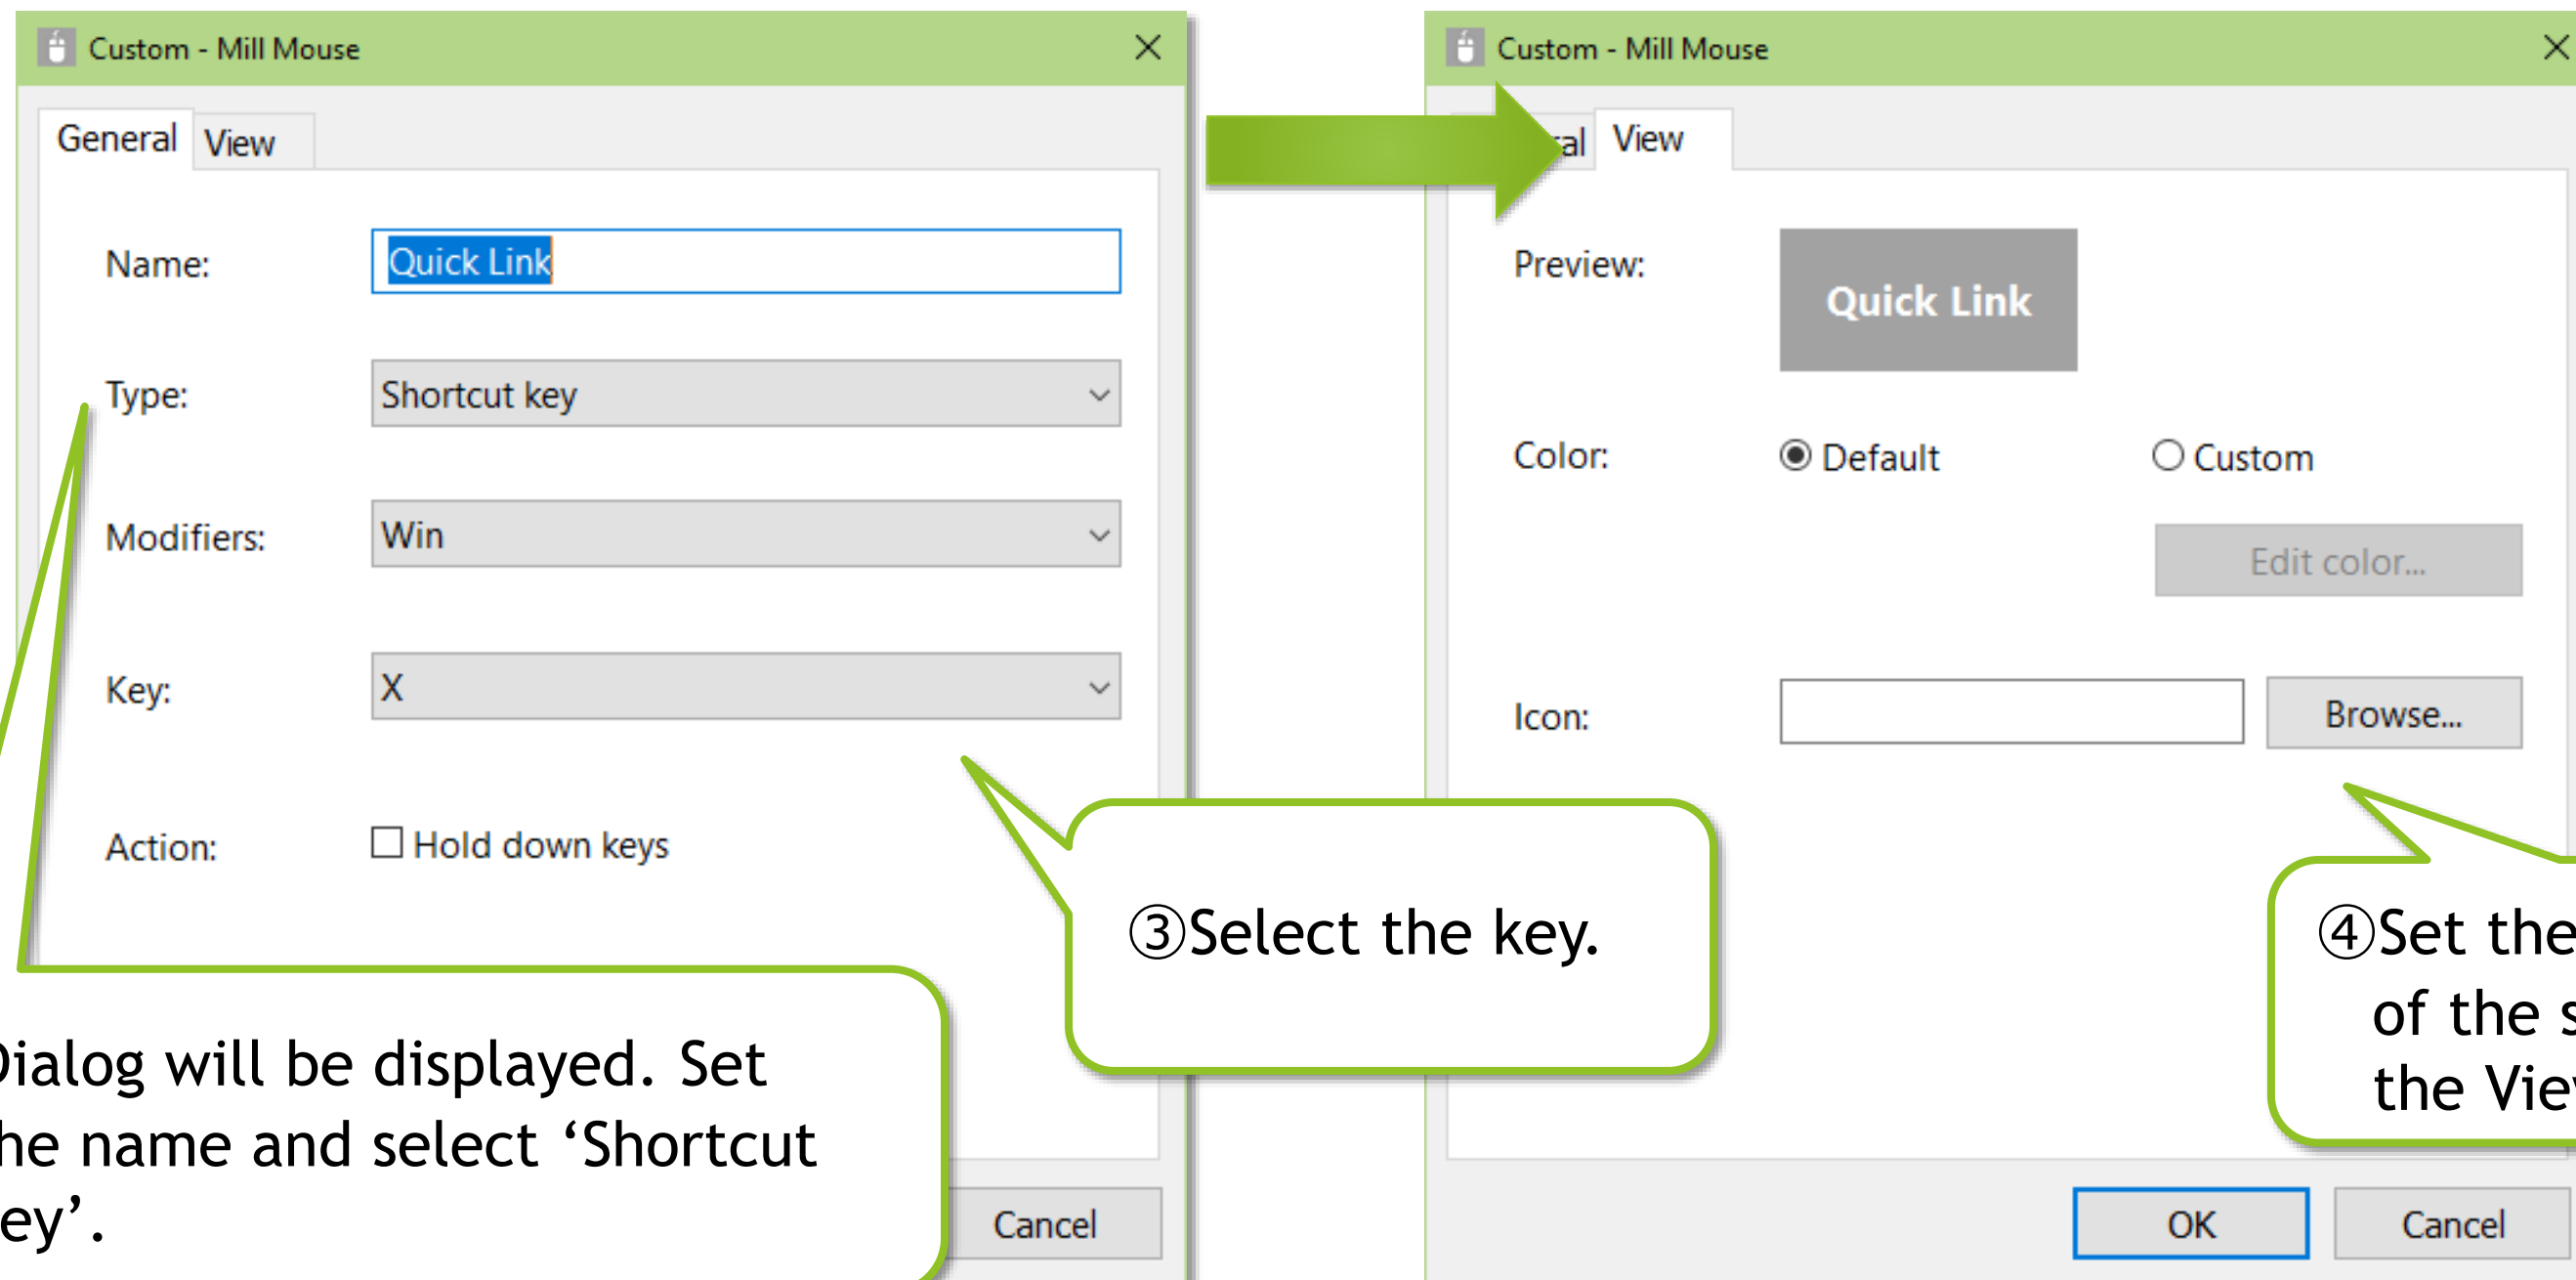

You can add up to 20 custom shortcut keys.

# Settings - Add custom shortcuts

(Continued)

② Dialog will be displayed. Set the name and select 'Shortcut key'.

③ Select the key.

④ Set the color and the icon of the shortcut button on the View tab and press OK.

✂ For Name, set a short string to be displayed in the window as the following ⑥.

# Settings - Add custom shortcuts

(Continued)

⑤ It will be added to 'Available shortcuts'. Press ► button to move it to 'Current shortcuts'.

# Settings - Add custom shortcuts

(Continued)

⑥ It will be displayed in the window and can be performed in the same way as other shortcuts.

⑦ If you have checked 'Hold down keys' in ③, once you press the button, the shortcut key will remain pressed and the button color will be reversed. If you press the button again, the keys will be released and the button color will be restored.

✂ Unlike holding down the physical keys, the keys will not be entered repeatedly.

# Settings - Add custom texts

You can also set custom texts for input to the text editors or other apps, or reading aloud.

The screenshot shows the 'Settings - Mill Mouse' application with the 'Shortcuts' tab active. A dialog box titled 'Custom - Mill Mouse' is open, showing the 'General' tab. The dialog has the following fields and options:

- Name: Hello
- Type: Text
- Text: Hello
- Action:  Input text,  Hear text read aloud
- Buttons: Test, OK, Cancel

Callouts provide the following instructions:

- ① Press '+' button.
- ② Dialog will be displayed. Set the name and select Text.
- ③ Enter the custom text, select the action and press OK.

✂ For Name, set a short string to be displayed in the window as the following ⑤.

# Settings - Add custom texts

(Continued)

④ It will be added to 'Available shortcuts'. Press ► button to move it to 'Current shortcuts'.

# Settings - Add custom texts

(Continued)

⑤ The button will be displayed in the window.  
If you have checked 'Input text' in ③, press the button with the text editor open to input the text you have set.  
If you have checked 'Hear text read aloud' in ③, press the button to read the text you have set aloud.

# Settings - Shortcuts to launch other apps

You can also add shortcuts to launch other apps.

The image shows two overlapping windows. The background window is 'Settings - Mill Mouse', which has a top navigation bar with buttons for Speed, Input, Controller, Pause, Sound, Scroll, Click, Subaction, Keyboard, Shortcuts, Window, and Startup. The 'Shortcuts' button is highlighted. Below the navigation bar, there are two lists: 'Available shortcuts' and 'Current shortcuts'. The 'Available shortcuts' list includes 'Action Center (Win+A)', 'Show Desktop (Win+D)', 'File Explorer (Win+E)', 'Settings (Win+I)', and 'Connect (Win+K)'. The 'Current shortcuts' list includes 'Settings of Mill Mouse', 'Stop Eye Control', 'Start (Win)', 'Task View (Win+Tab)', 'Cut (Ctrl+X)', 'Copy (Ctrl+C)', 'Paste (Ctrl+V)', 'Delete (Del)', and 'Undo (Ctrl+Z)'. A green callout bubble points to the '+' button in the 'Available shortcuts' list, containing the text '① Press '+' button.' Another green callout bubble points to the 'Settings of Mill Mouse' item in the 'Current shortcuts' list, containing the text '② Dialog will be displayed. Set the name and select App.' The foreground window is 'Custom - Mill Mouse', which has a 'General' tab selected. It contains the following fields: 'Name:' with the text 'Paint', 'Type:' with a dropdown menu set to 'App', 'Target:' with the text 'ows\System32\mspaint.exe' and a 'Browse...' button, 'Arguments:' with an empty text box, and 'Start in:' with an empty text box. A green callout bubble points to the 'Target' field, containing the text '③ Set the path of the app to launch in Target and press OK.' At the bottom of the 'Custom - Mill Mouse' window are 'OK' and 'Cancel' buttons.

① Press '+' button.

② Dialog will be displayed. Set the name and select App.

③ Set the path of the app to launch in Target and press OK.

✂ For Name, set a short string to be displayed in the window as the following ⑤.

# Settings - Shortcuts to launch other apps

(Continued)

④ It will be added to 'Available shortcuts'. Press ► button to move it to 'Current shortcuts'.

# Settings - Shortcuts to launch other apps

(Continued)

# Settings - Separate windows

You can also show the shortcuts in separate windows. You can set up to 20 shortcuts.

① Select a shortcut from 'Current shortcuts' which you want to show in separate window.

② Press ▼ button several times to move it under 'Separate windows'.

# Settings - Separate windows

(Continued)

③ The shortcut button appears in a separate window on the desktop screen.

④ You can move it on the desktop screen by dragging inside. You can change the size by dragging the edges.

# Settings - Window display

On the Window tab of the settings dialog, you can change whether to keep the window on top, whether to automatically hide or fade the window, and the color of the window.

If you uncheck 'Automatically hide the window', the window position next time started will be the last end position.

✂ If high contrast is enabled, the color can not be changed.

# Settings - Startup

On the Startup tab of the settings dialog, you can change whether to automatically launch Mill Mouse when you sign-in to Windows and whether to terminate Tobii EyeX Interaction in the notification area of the taskbar.

# Other functions

# Others - Calibration of eye tracking

You can open the calibration screen of the eye tracking from Calibration on the menu displayed when you keep gazing at the title bar of the window.

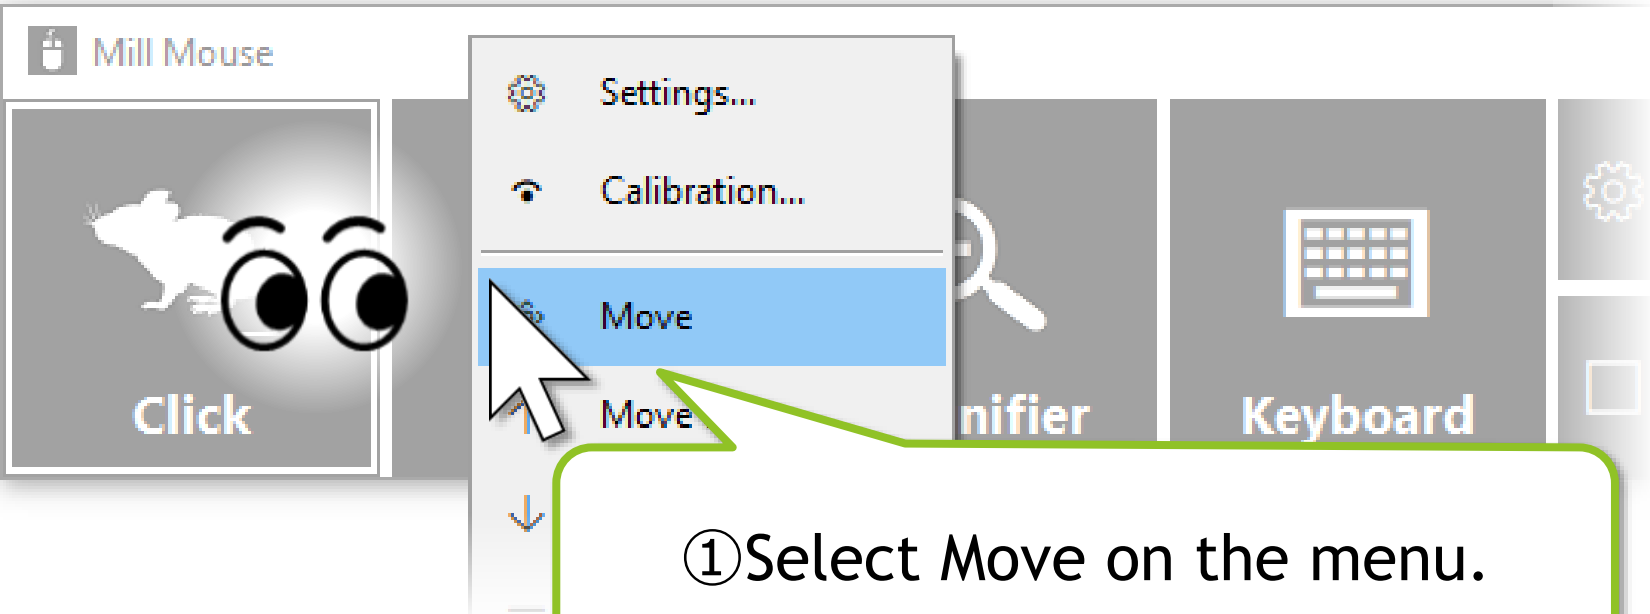

- ✂ If you use Tobii Eye Tracker 4C, Tobii EyeX, or SteelSeries Sentry, it takes about 10 seconds from the menu selection until the calibration screen is displayed.

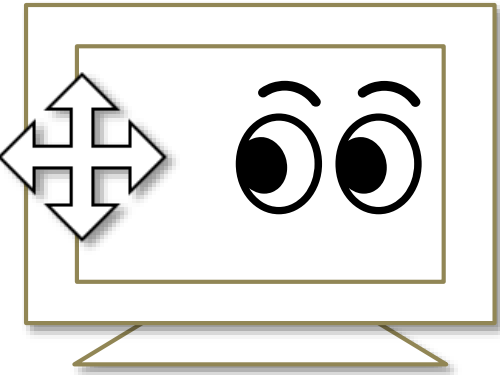

# Others - Vertical window

Move the window of Mill Mouse to the left or right edge on the desktop screen to display it vertically. Move the vertical window to the upper or lower edge on the desktop screen to revert it to the horizontal window.

① Select Move on the menu.

② Keep gazing at the left or right edge on the desktop screen.

③ The window of Mill Mouse will be displayed vertically.

The vertical window displays the following options from top to bottom: Click, Stretch, Magnifier, Keyboard, Settings of Mill Mouse, Stop Eye Control, Start, and a scroll bar.

# Others - Task View

Keep gazing at the middle height of the left edge on the desktop screen to display the Task View on Windows 10.

If it does not work, try to gaze at the outer frame of the monitor.

- ✂ Keep gazing at there on Windows 8.1, the list of recently used store apps will be displayed.
- ✂ On Windows 7, Flip 3D will be used when Windows Aero is enabled.

# Others - Action Center

Keep gazing at the middle height of the right edge on the desktop screen to display the Action Center on Windows 10.

If it does not work, try to gaze at the outer frame of the monitor.

- ✂ Keep gazing at there on Windows 8.1, the Charm bar will be displayed.
- ✂ Nothing special will be happened on Windows 7.

# Others - User Account Control

You can also click on the User Account Control dialog by eye tracking, which appeared when you install apps or run apps as administrator.

At that time, the window of Mill Mouse will not be displayed.

# Others - Camera panning during games

While playing a game that you pan the camera by mouse operation, you can pan in the direction you are looking at by using Mill Mouse.

While playing such a game, Mill Mouse will not click on it even if you keep gazing at the same place.

# Others - Combination with physical mouse

It is also possible to use in combination with a physical mouse device.

If you operate the physical mouse device while using Mill Mouse, the eye tracking will be paused and the operation by the physical mouse will take precedence. After stopping the operation by the physical mouse and waiting for a few seconds, you will be able to operate the mouse again with eye tracking.

In addition to the physical mouse, if you operate the right thumbstick of the Xbox controller, the eye tracking will be paused.

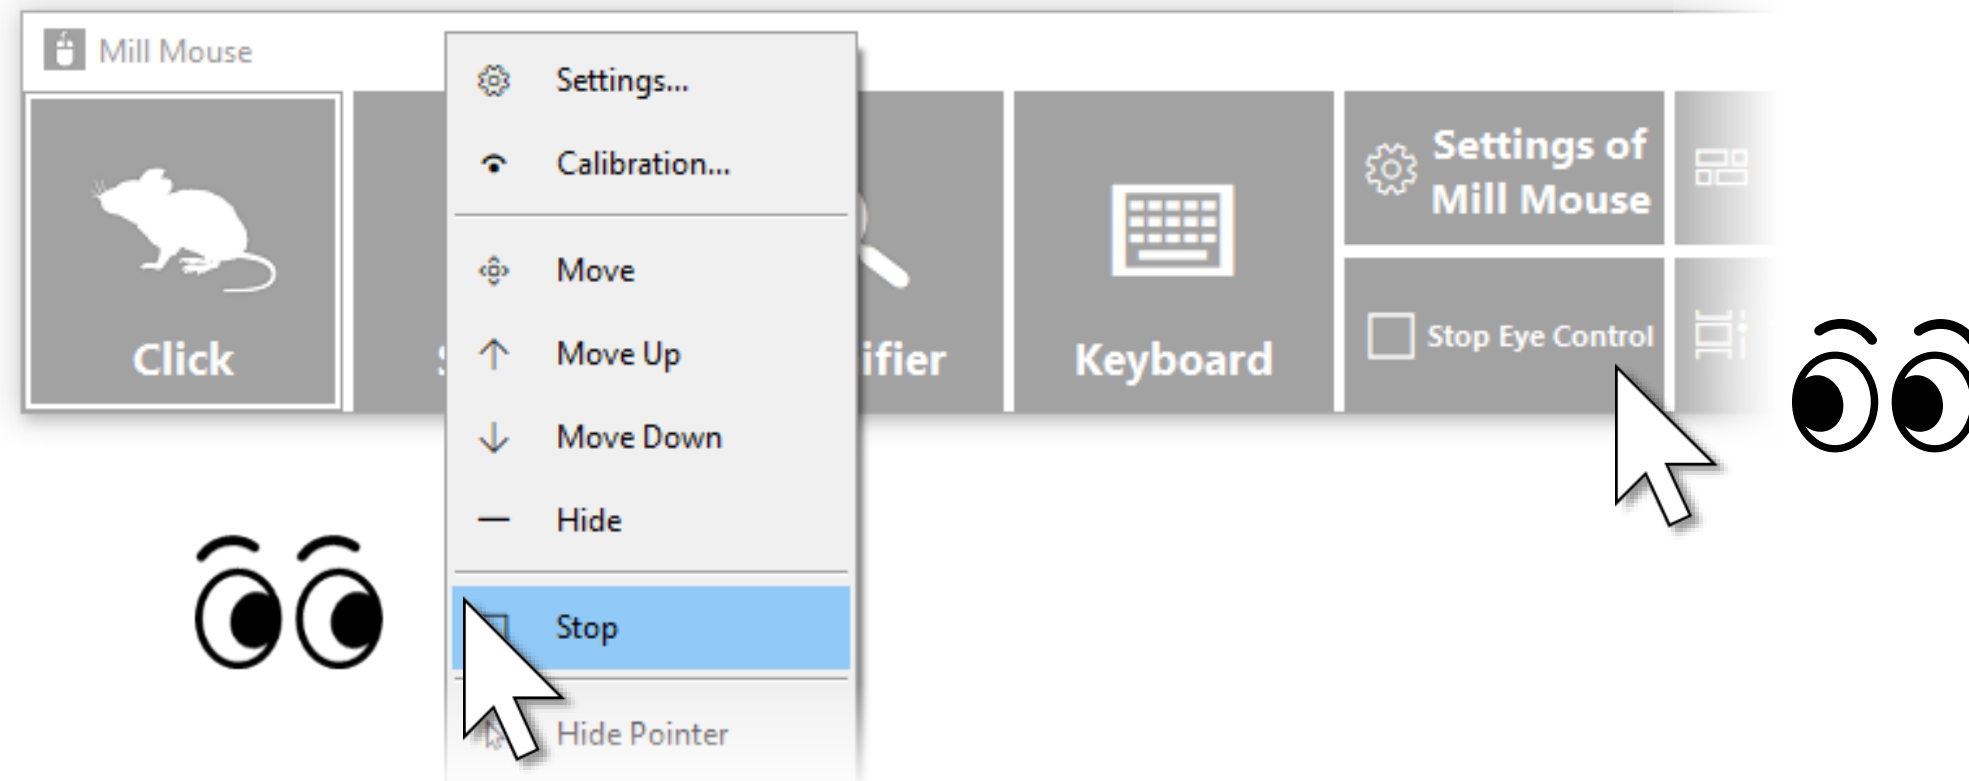

✂ You can change the settings to pause when you operate the physical mouse or the right thumbstick of the Xbox controller.

# Others - Stop eye tracking

If you do not need eye tracking for a long time, such as for watching movies, you can stop eye tracking.

To stop eye tracking, look at 'Stop Eye Control' shortcut or Stop on the menu displayed when you keep gazing at the title bar of the window. Then the window will be hidden.

Unlike the physical mouse operation described above, the stop will not be canceled automatically. You can cancel the stop by looking at the upper left corner of the desktop screen and re-displaying the window.

# Others - Stop eye tracking

If you press Alt + Shift + M, eye tracking will be stopped.

The stop will not be canceled automatically.

To cancel the stop which was done by the above keys, press Alt + Shift + M again.

# Others - Hide mouse pointer

If you do not need the mouse pointer but need click action, such as for reading e-books, you can hide the mouse pointer.

To hide the mouse pointer, select 'Hide Pointer' on the menu displayed when you keep gazing at the title bar of the window.

To unhide it, select 'Hide Pointer' again.

# Others - Mill Mouse specific shortcut keys

You can adjust the speeds with the following shortcut keys.

## ► Speed of the mouse pointer

Alt + Shift + 1	Slow
Alt + Shift + 2	Fast

## ► Interval between starting to gaze and doing click operation

Alt + Shift + 3	Long
Alt + Shift + 4	Short

# Others - Supported languages

Besides English, Mill Mouse supports the following languages.

The words in the window of Mill Mouse are displayed according to the language settings of Windows.

- ▶ Arabic
- ▶ Bangla
- ▶ Simplified Chinese
- ▶ Traditional Chinese
- ▶ Czech
- ▶ Dutch
- ▶ French
- ▶ German
- ▶ Greek
- ▶ Hindi
- ▶ Hungarian
- ▶ Italian
- ▶ Japanese
- ▶ Korean
- ▶ Polish
- ▶ Portuguese
- ▶ Russian
- ▶ Spanish
- ▶ Swedish
- ▶ Telugu
- ▶ Turkish
- ▶ Vietnamese

- ✂ In the Arabic environment, the window is appeared at the top right or the bottom left of the desktop screen.
- ✂ In the Spanish or Portuguese environment, some shortcut keys are changed, such as using Ctrl + G instead of Ctrl + S.

# Others - High contrast

Mill Mouse supports high contrast.

The color scheme of the window of Mill Mouse follows the high contrast settings of Windows.

✂ By default in Windows, you can enable or disable high contrast by pressing Left Shift + Left Alt + Print Screen keys.

# Tips - To enlarge buttons

If buttons are too small to operate, please change the settings with the following steps.

1. From the Start menu of Windows 10, click the Settings icon. 
  2. System > Display > Change the percentage of 'Scale and layout'.
  3. If it is still too small, set a larger size as 'Custom scaling' in 'Advanced scaling settings'. (In order to reflect custom scaling, you need to sign out from Windows 10 and sign in again.)
- ※ On Windows 8.1 or Windows 7, please change the settings by the following steps.
1. Right click on the desktop screen > Click 'Screen resolution'.
  2. Click 'Make text and other items larger or smaller'.
  3. Change it to a larger size and click Apply.
  4. Sign out from Windows and sign in again.

# Tips - Upgrading Tobii Core Software

If you face a problem after upgrading Tobii Eye Tracking Core Software to a new version, please try the clean installation as follows: (※The following steps are for people familiar with Windows. Calibration profiles for the eye tracking will be deleted.)

1. Uninstall the Tobii Eye Tracking software from 'Programs and Features' in Control Panel.
2. With Tobii Eye Tracker 4C or other eye tracking device connected to your PC, open Device Manager and uninstall EyeChip in 'Universal Serial Bus devices'. If EyeChip does not exist, uninstall the driver in 'Eye Tracking Devices'.
3. Open Registry Editor and delete the following keys:
  - HKEY\_CURRENT\_USER\Software\Tobii
  - HKEY\_LOCAL\_MACHINE\SOFTWARE\WOW6432Node\Tobii
4. Open File Explorer and delete the following folders:
  - %localappdata%\Tobii
  - %programdata%\Tobii
  - %programdata%\TetServer
5. Restart Windows.
6. Install a new version of Tobii Eye Tracking Core Software.
7. Calibrate the eye tracking.

# Tips - To use SSML or SAPI TTS XML

If you enable ‘Hear text read aloud’ as described on page 46 of this guide, you can write [SSML](#) or [SAPI TTS XML](#) in ‘Text’ as follows:

<b>SSML example</b>	<pre>&lt;spea k version="1.0"   xmlns="http://www.w3.org/2001/10/synthesis"   xml:lang="en-US"&gt; Hello&lt;break time="300ms" /&gt;How are you? &lt;/spea k&gt;</pre>
<b>SAPI TTS XML example</b>	<pre>&lt;p&gt; Hello&lt;silence msec="300" /&gt;How are you? &lt;/p&gt;</pre>

At the beginning of ‘Text’, write <spea k> in SSML, or any XML tag in SAPI TTS XML. Change the value of xml:lang attribute in SSML according to your language.

# Tips - To use SwiftKey on Windows 10

SwiftKey feature was added to the touch keyboard in Windows 10 October 2018 Update. Only some languages are supported.

To use SwiftKey with Mill Mouse, please follow the steps below.

① Change to Drag on Mill Mouse.

② Press Ctrl key on the touch keyboard.

④ You can input the following letters continuously just by looking briefly.

③ Keep gazing at the first letter until the pointer icon changes to .

# Uninstallation

To uninstall Mill Mouse, do it from 'Programs and Features' in Control Panel.

# Known issue

- ▶ With Tobii Eye Tracker 5, it works at a very low sampling rate of around 33Hz. Therefore, the mouse pointer does not move smoothly.

# Restrictions

- ▶ Mill Mouse is a free software. Author topolo-Z is not responsible for any situation resulting from the use of this application software.
- ▶ The bundled tobii\_stream\_engine.dll was developed by Tobii AB.
